

Why Join FREPA?

With **FREPA**, you're no longer alone in your efforts to promote renewable energy in Florida. We're here for you as an agent for positive change. **FREPA** balances the diverse interests of its members across the public and private sectors to advance the production and use of renewable energy. It's the first step in addressing the environmental and energy challenges facing us in the Sunshine State.

As a central source for information and action, **FREPA** raises awareness, facilitates renewable energy programs and strengthens public policy. **FREPA** brings together a respected network of energy producers and developers, service companies, utilities, researchers, environmental groups and other professionals to create new technologies, new products and new ways of thinking when it comes to energy and public policy.

How Can FREPA Help You?

- Access to **FREPA's** powerful network
- New ways to collaborate to reach a larger audience
- Opportunities to support programs that increase use of renewable energy technologies, products and programs.
- A larger voice in regional and state energy and economic development policies
- Participation with an active membership and high performing association to provide meaningful value for all sectors and stakeholders served
- Networking with Florida's renewable energy producers, auxiliary service providers and other professionals for project development.

Member Benefits

FREPA members gain valuable benefits that keep them directly involved in Florida's renewable energy industry and public policy, including:

Governmental Relations Services

- Representation before Florida's top elected officials
- Current information about public policy initiatives that advance renewable energy
- Access to **FREPA's** advocacy alert network for timely notice and action on renewable energy legislation
- Talking points, white papers and key contact information for contacting key legislators specific to policy goals supported by **FREPA**
- Posting of members' press releases on **FREPA's** media website.

FREPA's Weekly Headline News Roundup

This weekly news e-mail includes breaking news about Florida's renewable energy industry and is distributed to Florida's renewable energy professionals and key policymakers.

IGNITE Quarterly Newsletter

Members receive and may contribute to **IGNITE**, FREPA's renewable energy newsletter with news about Florida's renewable energy industry and public policy issues. Discounts offered on advertising in a publication that **directly** reaches the decision makers in your target market. *Corporate members receive up to a 15% discount on advertising.*

FREPA's Annual Membership Directory

Corporate members and companies will receive detailed listings in FREPA's ***Annual Membership Directory***, both in the alphabetical section and in the Service Category Buyer's Guide section. The directory is used by and distributed to energy professionals throughout Florida.

FREPA Annual Conference and Trade Show

FREPA members enjoy discounted registration, sponsorship and speaking opportunities in statewide conferences, tradeshows and workshops. An annual two-day summer event, ***FREPA's Renewable Energy Annual Conference*** of energy producers/developers, builders, engineers, professionals and governmental leaders from around Florida and beyond, provides expert speakers and panels, workshops, golf and tennis tournaments, and networking events.

- *Corporate members pay \$275*
- *All other members (except educators and students) pay \$375*
- *Non-members pay \$425*
- *Educators and students pay \$75*

The Energy Connections Trade Show brings Florida's renewable energy producers, developers, researchers and other professionals together for workshops, a tradeshow expo, networking and leisure. Again, corporate and company members receive tradeshow registration discounts and access to all events.

- *Corporate members pay \$275 to exhibit.*
- *All other members pay \$325 to exhibit*
- *Non-members pay \$375 to exhibit.*

As you can see, **FREPA** offers countless benefits for promoting renewable energy in Florida.
