### **The Florida Green Energy Ballot Initiative gains the support of Solar Nation, Inc**

Tallahassee- The Florida Renewable Energy Producers Association initiative, the [Florida Green Energy Initiative](#) announce that [Solar Nation, Inc](#) has issued a statement of support for the Florida renewable energy ballot initiative. And, with that support Solar Nation will be joining the initiatives outreach efforts in Florida.

Solar Nation is a program of [The America Solar Energy Society, Inc](#), one of America's oldest solar energy organizations. Solar Nations primary mission is to advance the solar industry in America . Solar nations large and established network of supporters and the credibility it has established as a source of educational information in the solar industry will serve to enhance the reach of the initiative and also act to communicate the core of the policy remedies sort in the initiative. With this new partnership and commitment of support, the Florida Green Energy Initiative has another great tool to assist it with identifying, building and maintain relationships with supporters. Solar nation has great reach within the Florida and beyond our borders.

Florida Green Energy Initiative Chairman, Michael Dobson said, "Solar Nation and its partners have served as a source of information, intelligent debate and a rallying point for renewable energy advocates from around the U.S. With their help, we will have a first rate outreach mechanisim not only for volunteers, but also donations."

The Florida Green Energy Initiative is a Florida renewable energy ballot referendum founded by the [Florida Renewable Energy Producers Association](#). Currently, the Renewable Energy Portfolio Standards (RPS) ballot is available at the organizations website. A second ballot question will be available soon that seeks to establish a Public Benefits Fund, which will be titled The Florida Clean Energy Fund. The initiative leaders are pleased that the support is growing and is working daily to expand its reach.
